

BOYSEN[®] ROOFGARD[™]

Gloss Acrylic Water-based Roof Paint

For technical reasons connected with color reproduction and paint manufacturing, the colors shown may not match the exact paint color.

BOYSEN® Roofgard™

BOYSEN® Roofgard™ is a gloss, acrylic, water-based roof paint designed to protect and adhere to galvanized surfaces. It gives a durable and flexible film and has fast drying time and good gloss retention. It is ideal for galvanized iron surfaces, pre-painted galvanized sheets, and unglazed roof tiles.

FEATURES

✓ **Excellent Adhesion**

It provides excellent adhesion on properly prepared roofing materials such as galvanized and concrete roof tiles. Its thermoplastic film remains flexible over time without cracking and peeling.

✓ **Easy Water Clean-Up**

No need for thinners and solvent reducers. Tools, painting equipment, spills, and paint drips can be cleaned by water and soap solution while still wet.

✓ **Good Corrosion Resistance**

It inhibits flash rusting on metal and provides good corrosion resistance with its specially formulated acrylic binder and pigment combination.

✓ **Outstanding Durability**

It provides excellent UV resistance and good gloss retention. The tightly adhering film retains its original color better than its solvent-based counterpart and offers good dirt pick-up resistance.

✓ **Rapid Drying**

It dries in an hour compared to the 8 hours drying time for solvent-based roofing paints. Recoating interval is 2-4 hours, resulting in faster paint jobs and significant labor cost savings.

✓ **Environmentally Safe**

It is low in odor, non-flammable, and does not use hazardous solvents. It also does not contain lead or mercury.

SURFACE PREPARATION

Wipe the surface with a rag soaked in paint thinner to remove grease, oil, wax and other foreign matter. For new galvanized surfaces, etch the surface by applying 10% BOYSEN Metal Etching Solution B-71 (Dilute 1 part of B-71 to 9 parts water). Rinse with water and dry immediately.

Unpainted galvanized surfaces that have been exposed for 6 months or more need not be etched.

For recoating pre-painted galvanized surfaces in good condition, sand lightly then wipe the surface with a clean rag before applying paint. Remove all loose paint film to sound surface. Spot prime bare substrate.

For corroded galvanized surfaces, remove rust by wire brushing and use BOYSEN Metal Etching Solution B-71. Let it stay for 10-15 minutes. Be sure to remove all remaining residue. Immediately prime after drying.

For unglazed roof tiles, clean surfaces to be painted to remove dirt, dust, grease, oil, and other contaminants.

For technical reasons connected with color reproduction and paint manufacturing, the colors shown may not match the exact paint color.

PAINTING SCHEDULE

NEW PAINTING

Primer:

Galvanized iron sheets: BOYSEN® Primeguard™, BOYSEN® Rust-Off™, BOYSEN® Red Oxide Metal Primer, BOYSEN® Epoxy Primer Red Oxide or Gray

Unglazed roof tiles: BOYSEN® Permacoat™ B-701 White or BOYSEN® EcoPrimer™ B-105

Topcoat: BOYSEN® Roofgard™ (at least 2 coats of any desired color)

REPAINTING

For galvanized sheets with paint in good condition, clean surface from dirt and dust by washing and apply 2 coats of BOYSEN® Roofgard™.

TECHNICAL DATA

Finish:

Gloss

Dry Time:

Touch: 1 hour

Recoat: 2 hours

Tinting:

No tinting required.

VOC:

<50 g/L

Thinning Solvent:

Use as supplied. If necessary, thin with not more than ½ Liter of clean water per 4-Liter can.

Packaging:

Available in 4-Liters and 16-Liters

Practical

Coverage:

30-35 sq. m.
per 4-Liters

Clean-up Solvent:

Water

Application:

By brush, roller, or airless spray
